The World's 1st Sensory Enrichment Environment

Available for the first time, safe, simple and effective relaxation that puts hours on your day and years on your life. Take an unused room in your house and turn it into a personal oasis of soothing tranquility. Experience the unique floating sensation of the Motion Lounge™ while you enjoy a full-body music massage. Coupled with high definition video, surround sound audio, and computerized scent-scaping, "sensory enrichment" is the new way to manage your stress in our time starved, overworked world.

Now you can finally do something to improve and protect your health on a daily basis. Unwind at home every day, like never before.

Realize the power of Relaxation

Serenity Suite™ provides a safe, simple, and effective workplace solution for relieving stress, reducing sleep deprivation, and improving cognitive function.

Unparalleled relaxation combining zero gravity motion, video, audio, vibro-massage and scent in a personal sanctuary featuring the M-lounge™.

20 minutes on the M-Lounge is equivalent to 2 hours of traditional meditation and 4 hours of REM sleep.

Unique motion of the M-Lounge emulates an optimized wave pattern and perfectly repeats it to trigger the "relaxation response".

Built in vibro-acoustic transducers provide a full cellular body massage and are coupled with surround sound audio. Hearing and feeling the sound takes music therapy to a whole new level.
