

INCREASE MASSAGE REVENUE AND CUT YOUR LABOR WITH...

Synergistic Massage

Introducing the Z-Lounge™

The world's first automated zero gravity motion relaxation system is now available for the spa environment. The Z-Lounge™ employs a sophisticated wave kinetic and sensory enrichment to achieve the "relaxation response". The key to a great massage is a clear client mindset. If the mind stays tense, so do the muscles. Relaxation starts with the mind body connection. The Z-Lounge™ provides a bridge treatment for a very powerful and pleasurable relaxation experience. Zero Gravity Motion is equally effective at triggering the "relaxation response" or sustaining it, and pre or post is synergistic with most other spa treatments. "Z" sessions are a new innovative solution for accelerating and extending relaxation in order to achieve the maximum benefits of a true "synergistic" massage.

Unattended labor-free transitional treatment

- Z-Lounge™ session runs 10-20 minutes and combines motion, sight, sound, and scent to delicately soothe the mind and body in a private inner sanctum.
- Features a chaise-like visco-elastic memory foam lounge designed in NASA's zero gravity position to simulate weightlessness.
- Z-Lounge™ moves the body in an orbital, tri-axial wave pattern, creating a floating sensation.
- The body literally feels the music as the unique vibro-acoustic system massages muscles.
- Z-Lounge™ has consistently proven to increase the benefits and effectiveness of massage therapy by allowing therapists to relieve stress in clients faster.
